What is a Kids' Hall & Mini Kids' Hall

The Kids' Hall and Mini Kids' Hall is designed to promote healthy mental and physical development of children in the community, as well as provide safe places for children to play, as well as comprehensive support for child-rearing.

Our basic policy stands on the foundation of "Working together with the community to create a center filled with the smiles of every child." We are managed and operated under the Sapporo Youth & women's Activity Association.

Introduction to Experiential Activities

We are the heroes and heroines!

Children's Management Committee

A Children's Management Committee is established at each Kids' Hall and Mini Kids' Hall, for the purpose of incorporating the opinions of children to create an environment that is fun and comfortable for the children who use the facility. The children who serve on the committee will contribute to make the rules for the Kids' Hall, plan and manage events, thus cultivating individual autonomy, and assertiveness.

Together with our local community

Intergenerational Exchange & Cooperative Business

With cooperation from the community, we implement various business and projects that aim to revitalize towns where children are the central focus. Further, in order to incorporate the opinion of the community into our business projects, we have established a Community Contact Association at each Kids' Hall.

Introduction to Experiential Activities

Take the first step toward social contribution! Experiential Volunteer Evenets

We host activities related to volunteer experience with children to cultivate a sense of empathy, and the desire to help others. Children who participate in such activities will help up trash in neighborhood parks to help with the "Zero trash project," or visit care centers for the elderly and perform songs and dances, and interact with the residents by playing traditional games.

Let's Grow Together! Club Activities

Through continued group activities, children learn to cooperate and have fun while achieving goals, and begin to mature into individuals. We are here to support such development of children.

Beyond the Borders of Kids' Hall Joint Events

In order to raise awareness of the Kids' Hall activities and spread of friendship and relationships between children in the community, we implement joint events in cooperation with other Kids' Halls throughout the area. We hold unique activities that are large scale, such as nature experiential events, sports events, and festivals.

Utilizing the Uniqueness of the Hall Other Experiential Events

Each Kids' Hall strives to implement creative and innovative experiential activities that support the enrichment of the children's hearts and minds. (crafts, cooking, traditional games, readings, group play, sports events, and more.)
